Dishwasher - Restaurantmanager

My first job was handling dishes in a nightclub, I worked my way up to restaurantmanager. While here I learned important skills that helped me develop future skills related to all types of work, including management and people skills.

2025-

○ Outlier.ai

Ai development

When I decided to start studying Java I started working extra online with training AI models on outlier.ai which helped me develop my core understanding of how to evaluate LLM responses and how to properly structure a prompt to get the desired result. I believe this will be a key factor to my success in my future career in Java development when I finish my studies in June 2026.
